

# Vantex

Ultra low maintenance Ni-Cd batteries

## Highly compact racks

### Up to 50% reduced footprint

Take benefit of Vantex Ultra Low Maintenance batteries with ALCAD new generations of compact racks.

ALCAD has developed a new partnership with Alpha Passoni, so as to give the opportunity to end-customers to store more battery capacity per volume.

This new ALCAD compact solution enables a battery capacity to increase up to 50% compared to the stand rack.

### Fit for all applications requiring space effective installations

Designed and manufactured to the very highest standards, ALCAD new compact racks are particularly fit for all applications requiring space effective battery installations. From utilities, off-shore oil & gas installations, to all applications with limited available space.

Alcad compact rack includes a flat solution with up to 6 rows deep stand, 3 tiers and also 4 tiers for cell sizes up to 75 Ah (L-type) and 65 Ah (M-type). Footprint is decreased with one third when adding extra tiers. Moreover, the use of welded gables instead of bolts enables an easier and quicker installation.

### Enjoy 30 years piece of mind

ALCAD new compact racks are designed to last 30 years and are particularly resistant thanks to their epoxy powder coating that gives electrolyte protection to its robust steel construction.

When using our ALCAD Vantex compact racks, you can take advantage of the long maintenance interval, in case of water refilling and visual inspection.

All standard sizes of compact racks are possible to size in Basics.
